

Permanent Downhole Gauge

Dual Port Piezo, Opt. 3-Axis Accelerometer

APS420

DESCRIPTION

The APS420 is a silicon piezo-resistive permanent down hole gauge with 2 pressure ports that monitors temperature and pressure. The optional accelerometer measures 3 axis vibration. Proprietary technology is used to digitize the pressure, temperature and vibration readings for the ASR200/ASR240 surface readouts. The fully assembled APS420 with the Kemlon Cover and the TEC support cable provide a dual seal at the TEC cable head. The TEC cable head options are 1/8", 1/4" or 4mm OD. The pressure fittings are either 1/8" or 1/4" FNPT or compression F375C. The second side port is 1/16" FNPT.
