

Permanent Downhole Pass Thru Gauge

Single Port Piezo, Opt. 3-Axis Accelerometer

APS600

DESCRIPTION

The APS600 is a silicon piezo-resistive permanent pass thru down hole gauge with 1 pressure port that monitors temperature and pressure. The optional accelerometer measures 3 axis vibration. Proprietary technology is used to digitize the pressure, temperature and vibration readings for the ASR200 surface readout. The fully assembled APS600 with the Kemlon Cover and the TEC support tube provide a dual seal at the TEC cable head. The TEC cable head options are 1/8", 1/4" or 4mm OD. The pressure fittings is 1/16" FNPT.
